Company Background

Ginger Lehmann is a leader in the highways market, providing a complete range of UKPMS Surveys (Course Visual Inspection (CVI) / Detailed Visual Inspection (DVI) / Footway Network survey (FNS) / SCANNER / Asset Surveys), and services to Local Authorities and engineering consultants to help them deliver better value for money and service in managing and maintaining our road network.

Ginger Lehmann Ltd is part of Groupe Ginger a French based engineering and infrastructure services provider, the Ginger Group and its subsidiaries employ 1,700 people worldwide.

The Role

This is a field-based position completing all types of Condition and Asset Surveys of our clients' highway networks. As we undertake a wide range of survey types, you will need to be versatile and able to adapt to different methods of working. Some surveys can be undertaken from a moving vehicle and require data to be inputted to a laptop manually, some survey vehicles are automated and require the surveyor to operate the equipment, checking that everything is working correctly and navigating to clients' networks. Finally, you will also be undertaking walked surveys, using our bespoke software you will inspect our clients' highway/footway networks and record condition and inventory data onto a handheld PDA. This will require interpreting mapping and description information to correctly identify the specific extents to survey. You may be required to walk more than 10km per day on some projects. When undertaking vehicle-based surveys, a works vehicle will be provided, during walked surveys, the surveyor will require the sole use of their own vehicle to travel to and from site locations.

Condition information is recorded to UKPMS standard and full training will be given to the successful candidates. Successful candidates will be offered the opportunity to gain a UKPMS Surveying Accreditation which Ginger Lehmann will arrange and pay for.

All staff must ensure that the company's environmental policy is adhered to.

Location

This is a field-based role, so you are required to be mobile. Your work will be carried out throughout the UK and may require extended periods away from home on a Monday-Friday basis. The company will provide you with all reasonable travel and accommodation expenses.

Required Skills

- Full UK driving licence.
- Exclusive use of own vehicle.
- Reasonable level of fitness as role requires walking.
- Excellent IT literacy, including experience of MS Word and Excel.
- Excellent map reading ability.
- Good eye for detail to identify errors.
- Logical approach to problem solving.
- Good verbal and written communications skills.
- Ability to work to deadlines and productivity targets.
- Flexibility to meet the business needs.

Desirable skills

- Experience of highway surveying
- Experience of using mapping applications (GIS)
- UKPMS Course Visual Inspection/Detailed Visual Inspection Accreditation
